

The Future Generation of Drum Brake Linings

MERITOR™

ArvinMeritor™

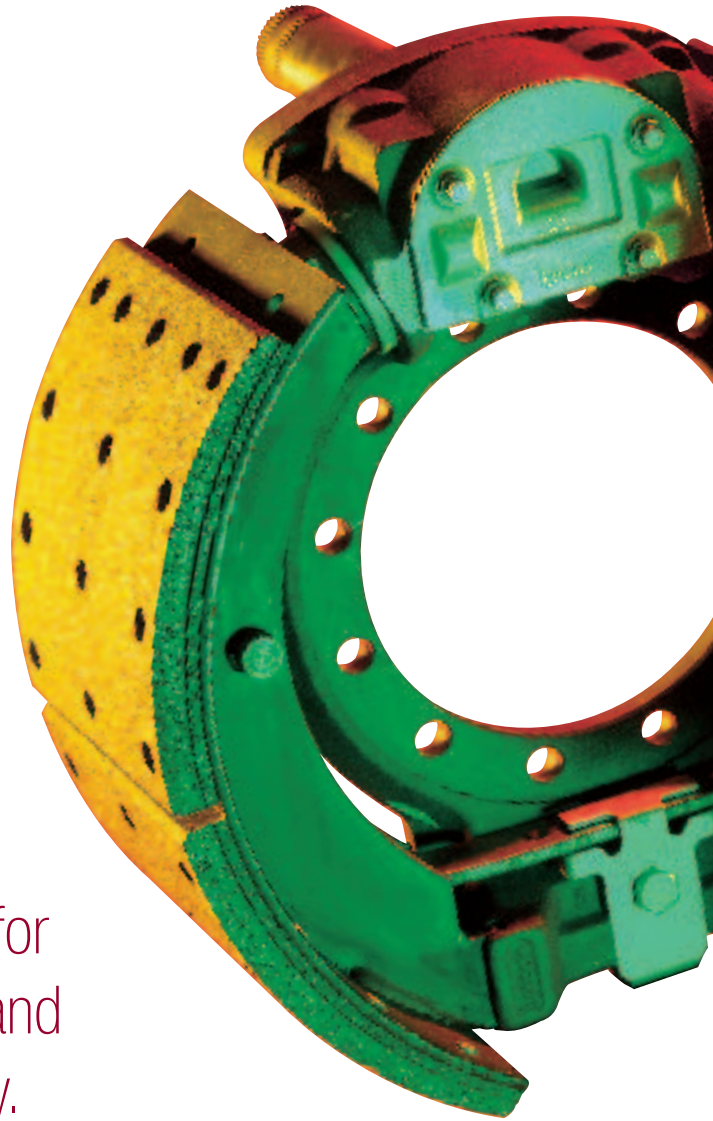

Meritor - an ArvinMeritor Brand

The Future Generation of Drum Brake Linings

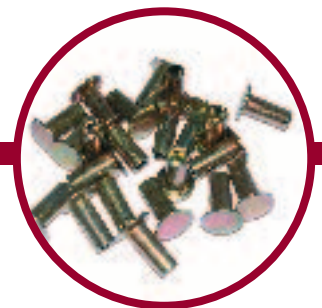

ArvinMeritor is the world's largest "tier-one" original equipment supplier of foundation brakes, drive axles, trailer axles and related products – products that include well known brand names such as ROR, Rockwell and the former Lucas Heavy Vehicle Braking Systems.

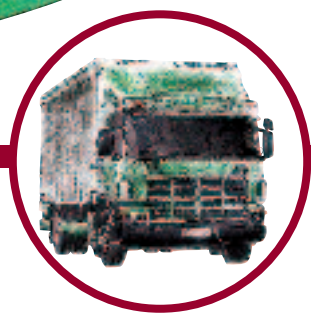

The company is a major original equipment supplier of disc and drum braking products to the leading European truck, trailer, bus and coach builders, and is also a specialist supplier for agricultural and off-road vehicles.

All commercial vehicle aftermarket products are distributed to the European and Export markets under the "Meritor" brand.

Meritor is *the quality brand* for commercial vehicles - parts and service on which you can rely.

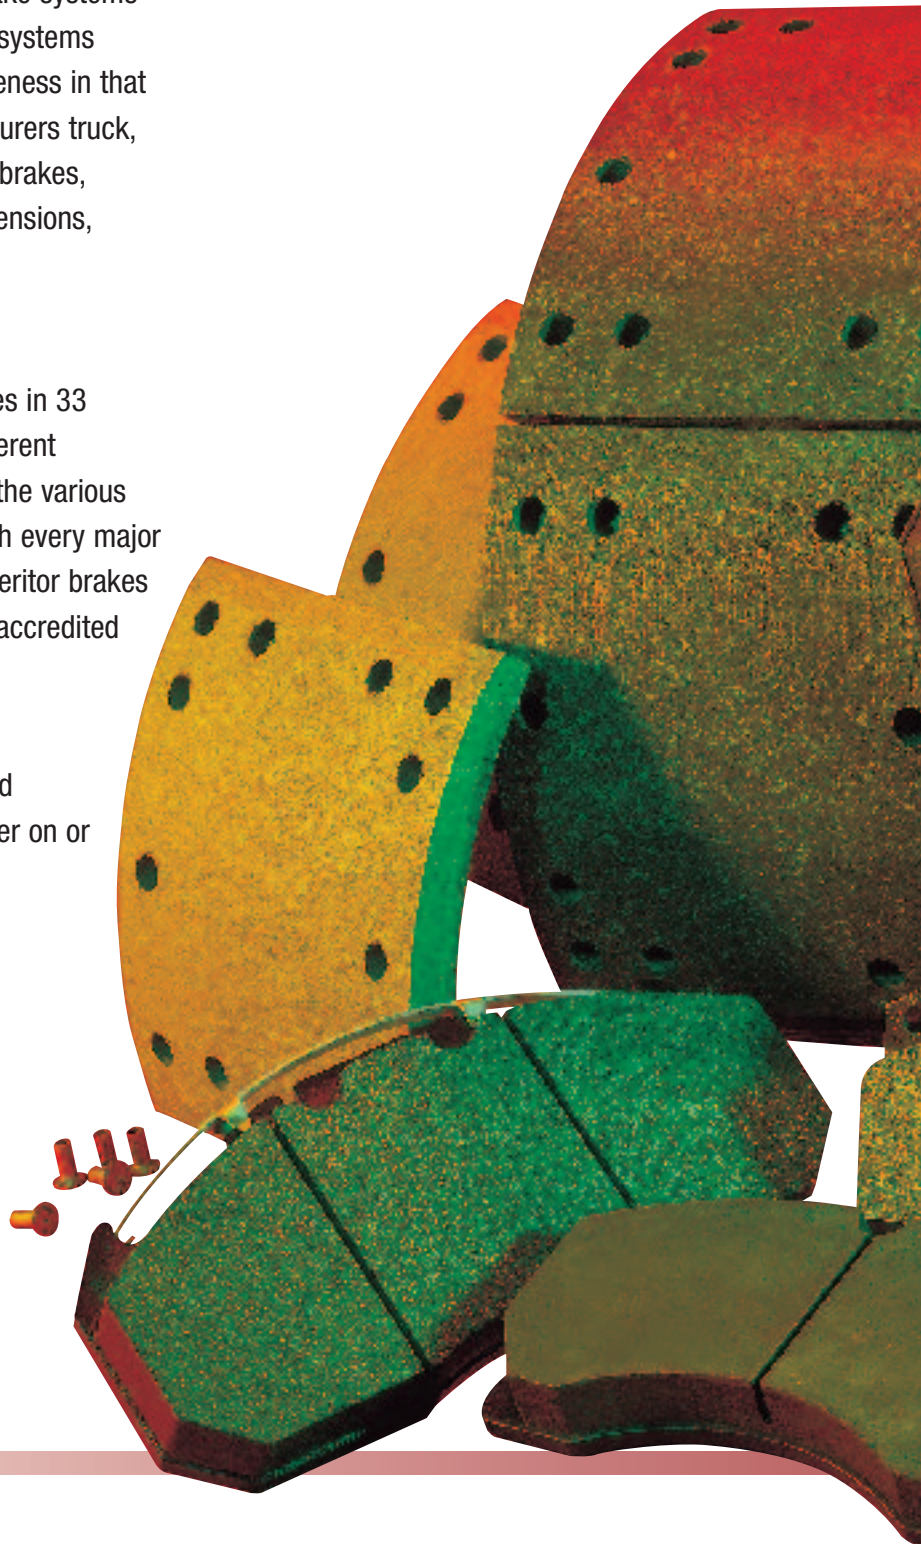

Meritor - Expertise in Friction

ArvinMeritor is not only a leading brake systems manufacturer but also the complete systems producer – ArvinMeritor has a uniqueness in that it is the only company that manufactures truck, bus and trailer axles, disc and drum brakes, associated trailer products and suspensions, together with actuation products.

The company has manufacturing sites in 33 locations around the world in 13 different countries. It deals with and controls the various vehicle application specifications with every major producer of friction materials, and Meritor brakes are researched, developed and fully accredited in conjunction with the major Vehicle Manufacturers.

Therefore the company has unrivalled expertise in “stopping” vehicles, either on or off the road.

Our knowledge of friction products is *“second to none”*.

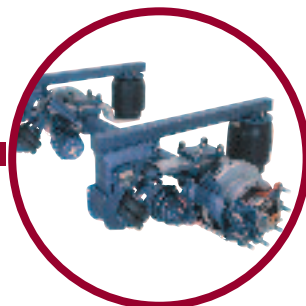

Meritor offers a comprehensive range of Meritor Brake Linings, with materials developed and specifications controlled by its engineering departments, for both original equipment and aftermarket use in Europe.

Meritor Drum Brake Linings are “edge marked” with the relevant material identification.

Meritor 329 – an organic friction material with metal inclusions developed for medium to heavy duty “S” cam brakes. This material is particularly stable under a wide variety of operating conditions and has excellent drum wear characteristics.

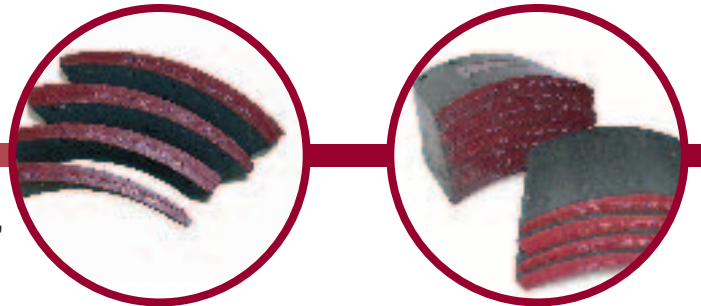

Meritor 401 – an organic friction material with metal inclusions specifically developed for the heaviest duty applications and the increased demands made by modern transport operations. It exhibits excellent performance across a wide range of weight and speed parameters and has very good resistance to fade.

Meritor 402 – an organic friction material specifically developed for heavy truck applications utilising full length lining applications.

Certification of Quality

Meritor knowledge develops and continuously improves the quality and performance specifications of its friction materials for trailer applications, and now has a complimentary range of truck and bus materials. These friction materials, exclusive to Meritor, are “hard-marked” with the Meritor brand and are derived from the original equipment formulations to achieve the necessary UNECE R90 regulations.

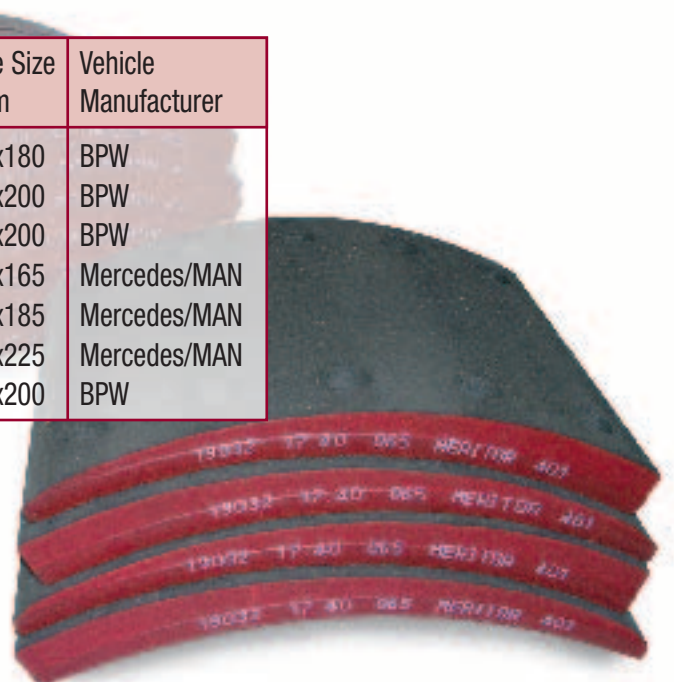

All Meritor Brake Linings are supplied in axle sets, complete with the necessary fitting instructions and information, and in tamper proof packaging, conforming to UNECE R90 regulations. All Meritor Brake Linings are asbestos free formulations and contain minimal “heavy metal” levels in compliance with the European environmental regulations.

The result is a range of friction materials that can be confidently recommended to fit any commercial vehicle and the quality is guaranteed. The following table shows the current Meritor friction qualities with the corresponding UNECE R90 approval numbers:

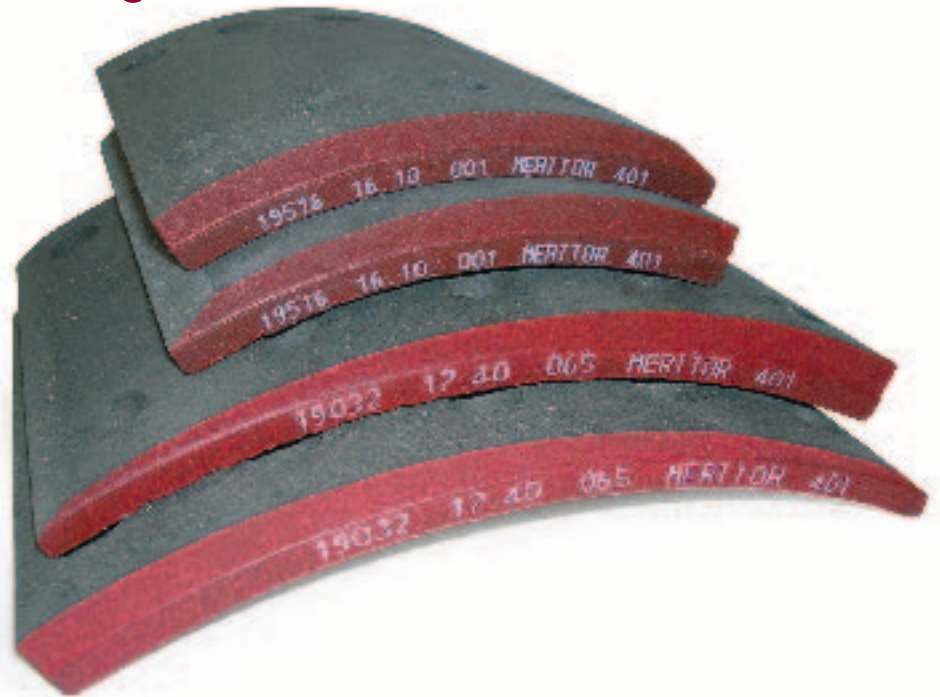

The Meritor brand has *the widest range* of UNECE R90 Approved Drum Brake Linings for European Commercial Vehicles

UNECE R90 Approval Number	Meritor Reference	Category	Brake Size in mm	Vehicle Manufacturer
E ₄ -90R-01-422/147	MBLK2000	03,04	420x180	BPW
E ₄ -90R-01-422/148	MBLK2010	03,04	420x200	BPW

Why it Makes Good Sense to Distribute Meritor Brake Linings.

ArvinMeritor's worldwide manufacturing facilities and position in the automotive business give it the strength and ability, more than any other single supplier, to determine the most suitable friction materials for heavy vehicle applications.

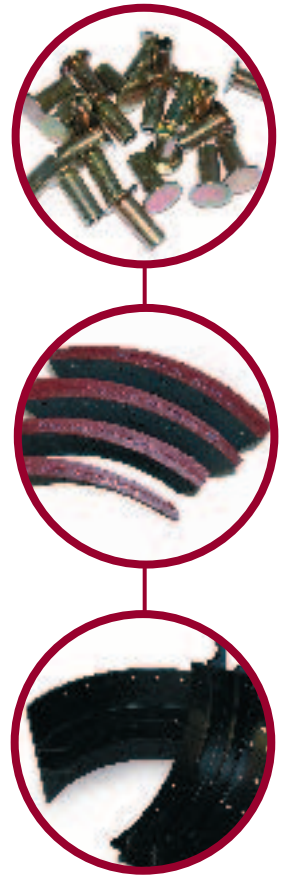

For the authorised Meritor distributor it makes sense to stock Meritor Brake Linings because:

- all brake linings are marketed under the strong “Meritor” brand
- they are technically capable and fully researched for the applications offered
- they have an unrivalled product integrity and quality standard
- they are UNECE R90 approved and fully supported by the Meritor warranty standards
- they are most importantly, price competitive in the various markets

Also Meritor distributors have:

- dedicated Customer Service support centres – in Switzerland and England
- support staff with multi-language skills answering technical and customer queries
- have the facility of a reliable parts “VOR” service
- CD and paper, “user-friendly” catalogues
- extensive technical support

For Commercial Vehicles Meritor is Europe's Leading Manufacturer and Aftermarket Supplier of Axle, Suspension and Braking Systems.
